Trusted Platform Module (TPM) Upgrade/Downgrade process for Windows 7 and 10 operating system Upgrade/Downgrade Trusted Platform Module (TPM) Upgrade/Downgrade process for Windows 7 and 10 operating system Upgrade/Downgrade.. On some Windows 7-based and Windows-8 based devices, a Trusted Platform Module (TPM) is not recognized as a compatible device and cannot be used for certain applications such as BitLocker Drive Encryption and Virtual Smart Card.. Additionally, if you check the status of the TPM by using Windows TPM Management Console, you receive a 'Compatible TPM cannot be found' message.
